Molecular Pathology Tier 2 Molecular CPT Codes

Introduction

The administrative handling of Tier 2 Molecular Pathology CPT codes 81400-81408 is addressed by this guideline. The assessment of medical necessity of tests billed with Tier 2 molecular pathology codes is addressed separately.

Procedures addressed

The inclusion of any procedure code in this table does not imply that the code is under management or requires prior authorization. Refer to the specific Health Plan's procedure code list for management requirements.

<table>
<thead>
<tr>
<th>Procedures addressed by this policy</th>
<th>Procedure codes</th>

### What are molecular pathology Tier 2 molecular CPT codes

**Definition**

Tier 2 codes are intended to report a wide range of molecular pathology procedures for which Tier 1 or other test-specific CPT codes have not been assigned.
Tier 2 code use

Tier 2 codes are organized and assigned based on level of technical and interpretive effort required. Each code includes examples of analytes that might be appropriate for assignment to that code in parentheticals, but this is not meant to complete.

The 2019 AMA CPT Professional codebook states the following regarding use of the Tier 2 codes:

- “Use the appropriate molecular pathology procedure level code that includes the specific analyte listed after the code descriptor. If the analyte tested is not listed under one of the Tier 2 codes or is not represented by a Tier 1 code, use the unlisted molecular pathology procedure code, 81479.”

Criteria

Authorization Requirements

- The following information must be submitted for medical necessity review of CPT codes 81400 through 81408:
  - Details about the test being performed (test name, description, and/or unique identifier), and
  - Laboratory that will be performing the test, and
  - All CPT codes and units that will be billed related to the entire test, and
  - Clinical information, which may include:
    - All information required by test-specific policy, or
    - Test indication, including any applicable signs and symptoms or other reasons for testing, and
    - Any applicable test results (laboratory, imaging, pathology, etc.), and
    - Any applicable family history, and
    - How test results will impact patient care if available

Claims Review and Payment Rules for 81400-81408

- A Tier 2 code should only be used when the AMA has specifically assigned the performed test to a Tier 2 code (i.e., laboratory self-assigned Tier 2 codes will not be accepted). Laboratories may not self-assign tests to Tier 2 codes that are not specifically listed as analytes by the AMA.
- Claims submitted for 81400 through 81408 may require a unique test identifier. Please refer to the Unique Test Identifiers for Non-Specific Procedure Codes guideline for additional information.
• All claims received for 81400 through 81408 are subject to the applicable authorization requirements regardless of the specific test performed.
