

CLINICAL GUIDELINES

CMM-204 ~ Prolotherapy

Version 19.0 | Effective August 11, 2017

eviCore healthcare Clinical Decision Support Tool Diagnostic Strategies: This tool addresses common symptoms and symptom complexes. Imaging requests for individuals with atypical symptoms or clinical presentations that are not specifically addressed will require physician review. Consultation with the referring physician, specialist and/or individual's Primary Care Physician (PCP) may provide additional insight.

CMM-204~Prolotherapy

CMM-204.1 Definition

Prolotherapy is defined as an injection or a series of injections designed to strengthen weak or lax ligaments, tendons or joints by injecting various proliferating agents (sclerosing solutions) directly into the proposed damaged or stretched ligaments or tendons or into a joint or its adjacent structures to create scar tissue in an effort to stabilize the joint or tendon. Agents used with prolotherapy have included zinc sulfate, psyllium seed oil, combinations of dextrose, glycerin and phenol, or dextrose alone.

CMM-204.2 General Guidelines

Based on the lack of conclusive scientific evidence demonstrating the clinical efficacy of prolotherapy combined with the potential to expose individuals to serious adverse side effects or complications, the use of prolotherapy in the treatment of musculoskeletal pain and/or instability (e.g., laxity, weakness) is considered experimental, investigational or unproven.

CMM-204.3 Procedure (CPT®) Codes

This guideline relates to the CPT® code set below. Codes are displayed for informational purposes only. Any given code's inclusion on this list does not necessarily indicate prior authorization is required.

CPT®	Codes Considered Experimental, Investigational, or Unproven
M0076	Prolotherapy

This list may not be all inclusive and is not intended to be used for coding/billing purposes. The final determination of reimbursement for services is the decision of the health plan and is based on the individual's policy or benefit entitlement structure as well as claims processing rules.
