

# Other Cancer Type Hyperthermia Radiation Therapy Physician Worksheet (As of 25 March 2019)

Hyperthermia is the process by which a superficial tumor is heated in anticipation of being irradiated concurrently. Please note that hyperthermia is not supported when done alone or with chemotherapy. Hyperthermia is not to be confused with HIPEC (hyperthermic intraperitoneal chemotherapy) which does not fall under the scope of Radiation Therapy.

For NON-URGENT requests, please complete this document for authorization along with any relevant clinical documentation requested within this document (i.e. radiation therapy consultation, comparison plan, etc.) before submitting the case by web, phone, or fax. Failure to provide all relevant information may delay the determination. Phone and fax numbers can be found on [evicore.com](http://evicore.com) under the Guidelines and Fax Forms section. You may also log into the provider portal located on the site to submit an authorization request. **URGENT (same day) requests must be submitted by phone.**

<b>Patient name:</b>		
<b>What is the hyperthermia start date (mm/dd/yyyy)?</b>		____ / ____ / ____
1.	Is radiation being delivered concurrently with hyperthermia?	<input type="checkbox"/> Yes <input type="checkbox"/> No
<b><i>If yes, please ensure a request for the external beam radiation has been submitted.</i></b>
