

Creating a Prior Authorization Request

Why does eviCore recommend that providers initiate prior authorization via eviCore's web portal?

Advantages of web

- **Saves time:** The process is faster than submitting authorization requests over the phone.
- **Potential for a real-time decision.**
- **Available 24/7:** You can access the portal any time, on any day.
- **Save your progress:** If you need to step away, you can save your progress and resume later. You have until the end of the business day to complete your request.
- **Upload additional clinical information:** No need to fax supporting clinical documentation; it can be uploaded in the portal to support a new request or when additional information is requested. Upload clinical information that supports/demonstrates the need for medically necessary, skilled therapy, such as the initial evaluation, a recent progress report/re-evaluation, or patient-reported outcome tools.
- **View and print determination information:** Check case status in real time.
- **Dashboard:** View all recently submitted cases. This enhancement allows providers to easily review and track the status of a submission.
- **Duplication feature:** If you are submitting more than one prior authorization request, you can duplicate information to expedite submissions.
 - The case duplication feature provides several options. When creating a case via eviCore's web portal, the following options are presented:

You can also start a new request using some of the same information.

Start a new request using the same:

- Program (Radiology)
- Provider (Generalist, Specialist)
- Program and Provider (Radiology and Generalist, Specialist)
- Program and Health Plan (Radiology and Medicare)

- **TIP:** Group eviCore authorization requests together to reduce the need to log in for each individual request.
- **TIP:** Eligibility for a real-time decision depends on the method of submission, condition type, request number, and completeness of information provided with the request. Real-time decisions are limited to requests initiated by web or phone. MSK conditions are eligible to receive real-time decisions at the initial request and first follow-up, as long as sufficient clinical information is provided.

Note: If the prior authorization request is from the state of Washington, and the episode is eligible for use of six visits before prior authorization is required, eligibility for a real-time decision is limited to the initial prior authorization request.

Non-MSK conditions are only eligible for a real-time decision at the initial request.

eviCore Specialized Therapy

Frequently Asked Questions

Why do I need to enter the discipline when requesting authorization via www.eviCore.com?

In situations where health plans allow multiple provider types to utilize a physical medicine benefit, eviCore currently allows a variety of provider types to create a case using the MSMPT code. Entering the specialty type (discipline) ensures that the request will route to the correct specialty reviewer (e.g., PT, chiropractor, acupuncturist, massage therapist) for review.

- **TIP:** Chiropractors: When a prior authorization request is created under the Chiro code, the authorization will cover both spinal manipulation AND physical medicine CPT codes. There is no need to create a separate MSMPT request to cover physical medicine CPT codes.

I want to change my answer. Why am I unable to move backward in a case created via the web portal?

Depending where you are in the case, your ability to move backward to correct answers may be limited. If you are answering the initial administrative questions, you will be able to move backward to correct errors.

However, once you enter the clinical portion of the process and begin answering clinical questions, you will be unable to go back to change your answers. This limitation is intentional. It prevents providers from modifying answers if they are not satisfied with the determination they obtain. While this may not be a concern for therapy cases, it is for cases submitted for some of the other specialties eviCore manages.

- **TIP:** Once you enter the clinical portion of the pathway, review your answer before submitting and moving to the next page.

When I create a case on the web, why am I asked if the request is for routine care?

This question helps identify requests that are urgent, to ensure that each request is processed correctly. Most therapy cases do not meet the definition of “Urgent.” To be considered urgent, there must be risk to life, limb, or the ability to regain maximal function. The following will be presented when creating a case on the web:

Proceed to Clinical Information

Is this case Routine/Standard?

- If your request is urgent select **No**
- When a request is submitted as Urgent, you will be required to upload relevant clinical information
- You can upload up to FIVE documents in .doc, .docx, or .pdf format
- Your case will only be considered Urgent if there is a successful upload
- If the case is standard select **Yes**

- **TIP:** Unless the request meets the definition of “Urgent,” answer “Yes” to the question (“Is this case Routine/Standard?”) to continue to create your request.

eviCore Specialized Therapy

Frequently Asked Questions

What clinical information do I need to submit?

In general, for the *initial request*, eviCore asks for information about the condition, complexity, and functional status. If the request is for *continuing care*, the focus is on the resolution of complexities, change in functional status, and response to care. eviCore has created clinical worksheets to help you prepare a case via web or phone. In many offices, the therapist will answer the clinical questions on the worksheet. This reduces the potential for errors and eliminates the need for a non-clinical employee to retrieve information from the clinical record. Most of the information you will be required to enter (i.e., except for an updated patient-reported outcome score) is collected via routine assessment. There is no need to perform a formal re-evaluation or progress report.

Worksheets are available at <https://www.evicore.com/provider/online-forms-details?solution=msk%20therapies>.

- **TIP:** Have the clinician provide answers to the clinical questions included in the worksheet. This allows non-clinical staff to quickly provide the answers when creating a case by web or phone.

Why must I enter a patient-reported outcome with each request?

eviCore's decision considers the condition, complexities, functional status, and response to care, as well as historical information available at the time of the review. Each component is important in determining the medical necessity of the request. If any questions are unanswered, the visit allocation may be less than if the outcome score was included. (See the following TIP.)

- **TIP:** The answer entered for each question is considered when the visit/unit allocation is determined. If relevant information is lacking, fewer visits may be allocated. For example, a patient with shoulder pain and no patient-reported outcome score may only receive an approval for six visits. However, if a DASH or QuickDASH score is reported and demonstrates functional impairment, eight or more visits may be approved.
- **TIP:** When submitting your request via the web, the fields associated with outcome scores are pre-populated with numbers that do not make sense. This is intentional; these fields must be populated to enable the user to move to the next question. If you have a score to report, replace the pre-populated score. If you do not have a score to report, leave the pre-populated scores and move to the next question.
- **TIP:** When submitting a follow-up outcome score, please re-administer and submit scores from the same functional outcome tool used initially. This will allow eviCore to assess the patient's functional change since the last request.

How can I request visits for a limited service, for example instruction in a home exercise program, or fabrication of a splint (only)?

If ongoing care is not necessary but 1-2 visits are required for a limited service, answer "Yes" to the question asking if care is for a home program or splint/orthotic only. This pathway shortcut allows a provider to obtain 1-2 visits without requiring a therapist to submit clinical information for review.

Frequently Asked Questions

Why can't I attach clinical documents when requesting an authorization via eviCore's web portal?

To allow the opportunity for a real-time decision, eviCore limits the ability to upload additional clinical documentation. For MSK conditions, you can begin uploading clinical documentation at the third request. For non-MSK conditions, you can begin uploading clinical documentation at the second request.

When can I expect a review to be completed?

eviCore strives to complete reviews within 2 business days of receipt. However, turnaround times may vary based on the jurisdiction, federal/state regulations, line of business (Medicare/Medicaid/Commercial), or health plan requirements. For example, CMS allows up to 14 days to communicate a decision to a member.

- **TIP:** Submitting requests by web or phone increases the likelihood you'll receive a real time decision with reduced care delays.

How long will an authorization remain valid?

Authorization durations can vary, based on state requirements, health plan rules, or type of condition. Typically, the authorization duration will range from 30 days to 180 days.

- **TIP:** Check with the specific health plan to determine what specific rules apply in determining the authorization duration.

Timely filing

Note: Timely filing rules vary by health plan. Please consult the specific health plan's guidance to determine what the plan allows.

- **TIP:** Timely filing rules vary by health plan. Please consult specific health plan guidance to determine what a specific health plan allows.

If my patient requires more therapy, how early can I submit my request?

Requests for additional visits may be submitted as early as 7 days before the requested start date of the additional therapy.

- **TIP:** If additional care is required, do not wait until all approved visits have been exhausted before submitting a request for additional care. Submitting a request in advance of the requested start date will reduce the likelihood of interrupting the patient's care.

Frequently Asked Questions

Post-Decision Activities

Post-Decision Options

Information related to reconsideration/appeal is included in the letter you receive with the prior authorization determination.

Peer-to-Peer/Clinical Consultation

To schedule a Peer-to-Peer conversation via the web, log in to your account at www.evicore.com. Perform “Authorization Lookup” to determine the status of your request.

Click on the “P2P Availability” button to determine if your case is eligible for a peer-to-peer conversation:

Authorization Lookup

Authorization Number:	NA	
Case Number:		P2P AVAILABILITY
Status:	Denied	
P2P Status:		

If your case is eligible for a Peer-to-Peer Consultation, a link will display allowing you to proceed to scheduling without any additional messaging.

P2P AVAILABILITY	Request Peer to Peer Consultation
-------------------------	---

Pay attention to any messaging that displays. In some instances, a Peer-to-Peer conversation is allowed, but the case decision cannot be changed. When this happens, you can still request a Consultative-Only Peer-to-Peer. You may also click on the “All Post-Decision Options” button to learn what other action may be taken.

Authorization Lookup

Authorization Number:	NA	
Case Number:		Request Peer to Peer Consultation
Status:	Denied	
P2P Eligibility Result:	Post-decision options for this case have been exhausted or are not delegated to eviCore. You may continue to schedule a Peer to Peer discussion for this case but it will be considered consultative only and the original decision cannot be modified.	
P2P Status:		
	ALL POST DECISION OPTIONS	

Once the “Request Peer-to-Peer Consultation” link is selected, you will be transferred to eviCore’s scheduling software via a new browser window.

eviCore Specialized Therapy

Frequently Asked Questions

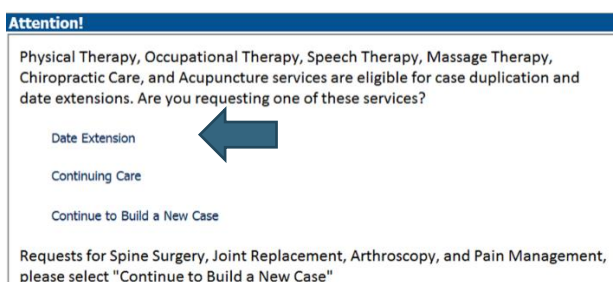

- **TIP:** A Peer-to-Peer must be conducted by a clinician, for example, therapist to therapist.
- **TIP:** Be prepared to share new supporting information that explains why additional care is medically necessary. If the original decision can be modified based on a Peer-to-Peer conversation, new information (not previously presented) must be provided.

Date extension

Date extensions are available if you are unable to use all visits within the approved period. You may extend for the period that is needed, up to a maximum of 30 days. One date extension is available per case.

- **TIP:** The extension must be requested *prior* to the expiration of the authorization.

You can request a date extension at www.eviCore.com

- **TIP:** If your patient experiences a gap in care due to vacation, illness, etc., requesting a date extension will allow you to use approved visits without the need to provide additional clinical information. Once the approved visits have been used, you can submit a request for additional care if necessary. Updated clinical information must be submitted with that new request.

Checking Authorization Status

You can look-up authorization status on the portal. Search by member information OR by authorization number with ordering NPI. You can view and print any correspondence.

Frequently Asked Questions

Resources Available to Providers

Prior Authorization Call Center: 855-727-7444

Call centers are open from 7 a.m. to 7 p.m. (local time). Providers can contact our PA call center to perform the following:

- Request prior authorization
- Check status of existing authorization requests
- Discuss questions regarding authorizations and case decisions
- Change facility or CPT code(s) on an existing case
- Request to speak to a clinical reviewer
- Schedule a clinical consultation with an eviCore Medical Director.

Web-Based Services and Online Resources

- You can access important tools, health plan-specific contact information, and helpful resources at www.evicore.com
- Select the **Resources** to view Clinical Guidelines, Online Forms, and more.
- **Provider's Hub** section includes many resources.
- The fastest, most efficient way to request prior authorization is through our provider portal. Our dedicated **Web Support** team can assist providers in navigating the portal and addressing any web-related issues during the online submission process. **To speak with a Web Specialist, call 800-646-0418 (Option #2) or email portal.support@evicore.com.**
- **Provider forums and portal training are offered weekly.** You can find a session at <https://evicore.webex.com>, select "Webex Training" from the menu, and search "upcoming" for an "eviCore Portal Training" or "Prior Authorization Online Portal Tips and Tools" session.
- Providers and their staff are welcome to attend a ***Therapy Provider Portal Training*** session in order to learn about the Portal and the therapy-specific resources offered at eviCore.com. Register for a session by going to <https://evicore.webex.com>, select Webex Training, and search "upcoming" for "Therapy Provider Portal Training."

Client and Provider Services

This dedicated team addresses provider-related requests and concerns, including:

- Questions regarding Accuracy Assessment, Accreditation, and/or Credentialing
- Requests for an authorization to be re-sent to the health plan
- Eligibility issues (member, rendering facility, and/or ordering physician)
- Issues experienced during case creation.

The team can be reached via email at **ClientServices@evicore.com (preferred)**, or phone by calling **800-646-0418 (option 4)**. For prompt service, please have all pertinent information available. When emailing, make sure to include the health plan in the subject line, with a description of the issue, and with member/provider/case details when applicable.

A review of our TIPS for improving your experience:

- Check with the health plan to determine what specific rules apply in determining the authorization duration.
- Timely filing rules vary by health plan. Please consult the specific health plan's guidance to determine what the plan allows.
- Submitting requests by web or phone increases the likelihood of receiving a real-time decision as the episode of care begins.
- Eligibility for a real-time decision depends on the method of submission, condition type, request number, and completeness of information provided with the request. For example, real-time decisions are limited to requests initiated by web or phone.
- MSK conditions are eligible to receive real-time decisions at the initial request and first follow-up as long as sufficient clinical information is provided. However, if the prior authorization request is from WA, and the episode is eligible for use of six visits before prior authorization is required, eligibility for a real-time decision is limited to the initial prior authorization request. Non-MSK conditions are eligible for a real-time decision only at the initial request.
- Have the clinician provide answers to the clinical questions included in the worksheet. This allows non-clinical staff to quickly provide the answers when creating a case by web or phone.
- The answer entered for each question may be key when the visit/unit allocation is determined. If there is information lacking, fewer visits may be allocated. For example, a patient with shoulder pain and no patient reported outcome score may receive approval for only six visits. However, if a reported DASH or QuickDASH score demonstrates functional impairment, eight or more visits may be approved.
- When submitting your request via the web, the fields associated with outcome scores are pre-populated with numbers that do not make sense. This is intentional; these fields must be populated to allow the user to move to the next question. If you have a score to report, replace the pre-populated score. If you do not have a score to report, leave the pre-populated scores and move to the next question.
- When submitting a follow-up outcome score, please re-administer and submit scores from the same functional outcome tool used initially. This will enable eviCore to assess the patient's functional change.
- Once you enter the clinical portion of the pathway, review your answer before submitting and moving to the next page.
- Unless the request meets the definition of Urgent, answer "Yes" to the question ("Is this case Routine/Standard?") to continue to create your request.
- If additional care is required, do not wait until all approved visits have been exhausted to submit a request for additional care. Submitting a request for additional care in advance of the requested start date will reduce the likelihood of interrupting the patient's care. A Peer to Peer must be conducted by a clinician, for example, therapist to therapist. Be prepared to share additional (new) information that explains why additional care is medically necessary.
- Group eviCore authorizations together to reduce the need to log in for each individual request.
- Chiropractors: When a prior authorization request is created under the Chiro code, the authorization covers both spinal manipulation AND physical medicine CPT codes. There is no need to create a separate MSMPT request to cover physical medicine CPT codes.
- If your patient experiences a gap in care due to vacation, illness, etc., requesting a date extension will allow you to use remaining approved visits without the need to provide additional clinical information. Once the approved visits have been used, you can submit a request for additional care if necessary. Updated clinical information must be submitted with that new request.
