

Radiation Therapy Small Cell Lung Cancer Request

For NON-URGENT requests, please complete this document for authorization along with any relevant clinical documentation requested within this document (i.e. radiation therapy consultation, comparison plan, etc.) before submitting the case by web, phone, or fax. Failure to provide all relevant information may delay the determination. Phone and fax numbers can be found on eviCore.com under the Guidelines and Fax Forms section. You may also log into the provider portal located on the site to submit an authorization request. URGENT (same day) requests must be submitted by phone.

nt/ er	First Name:	Middle Initial:		Last Name:
atient/ embei	DOB (mm/dd/yyyy):		Ge	nder: 🗌 Male 🔲 Female
μ	Health Plan:		Ме	mber ID:

	ICD-10 Code(s):					
	What is the radiation therapy treatment start date (mm/dd/yyyy)?					
	eviCore is utilizing a clinical decision support submission model for this diagnosis. Please note that only some of the following example questions will need to be answered during the submission of your prior authorization request. For best results, the answers to these questions should be submitted online.					
	Does the patient have a history of distant metastases (stage M1) (i.e. to brain, lung, liver, bone)? Yes No					
	What is the treatment intent?					
Clinical Information	Curative, No surgery planned or performed Curative, Post-operative (adjuvant) Curative, Pre-operative (neo-adjuvant) Curative, Treatment of the primary in an oligometastatic setting Palliative (non-curative, to alleviate symptoms) Prophylactic cranial irradiation (PCI) What is the stage of the lung cancer at the time of original diagnosis? IA IB IIC IIA IV or Extensive stage IIB Loco-regional Recurrence					
	If chemotherapy has been delivered, what has been the response?					
	 Partial response (PR) No response or stable disease Progressive disease Not applicable (N/A) 					

Will the patient be receiving concurrent chemotherapy?	How many						
3D conformal Intensity Modulated Radiation Therapy (IMRT) Tomotherapy (IMRT) Rotational Arc Therapy Proton Beam Therapy Proton Beam Therapy Stereotactic Body Radiation Therapy (SBRT) Biology-guided Radiation Therapy (BgRT) N/A Will image guided radiation therapy (IGRT) be used for treatment? Yes No Will the patient be receiving concurrent chemotherapy? Yes No Will treatment be delivered twice daily (i.e. BID)? Yes Please be prepared to submit consult note, results of imaging from the past 60 days and radiation relevant information may result in a delay.	Phase 1	Phase 2	Phase 3	Treatme	ent Technique		
Intensity Modulated Radiation Therapy (IMRT) Intensity Modulated Radiation Therapy (IMRT) Tomotherapy (IMRT) Rotational Arc Therapy Proton Beam Therapy Proton Beam Therapy Stereotactic Body Radiation Therapy (SBRT) Biology-guided Radiation Therapy (BgRT) N/A Will image guided radiation therapy (IGRT) be used for treatment? Yes No Will the patient be receiving concurrent chemotherapy? Yes N/ Will treatment be delivered twice daily (i.e. BID)? Yes No N/ Please be prepared to submit consult note, results of imaging from the past 60 days and radiation relevant information may result in a delay. Staltare to provide relevant information may result in a delay.				Conventional isodose planning, co	mplex
