Our Service Model

Enabling Better Outcomes

Enhancing outcomes through Client and Provider engagement

Client and Provider Operations Team –

Client Provider Representatives are cross-trained to investigate escalated provider and client related issues.

Client Experience Manager –

Client Service Managers lead resolution of complex service issues and coordinate with partners for continuous improvement.

Regional Provider Engagement Manager –

Regional Provider Engagement Managers are on-the-ground resources who serve as the voice of eviCore to the provider community.

Why Our Service Delivery Model Works

One centralized intake point allows for timely identification, tracking, trending, and reporting of all issues. It also enables eviCore to quickly identify and respond to systemic issues impacting multiple providers.

Complex issues are escalated to resources who are the subject matter experts and can quickly coordinate with matrix partners to address issues at a root-cause level.

Routine issues are handled by a team of representatives who are cross trained to respond to a variety of issues. There is no reliance on a single individual to respond to your needs.

eviCore healthcare relies on information about the patient's unique presentation and physician's intended treatment plan to authorize all services from the initial simulation through the delivery of the last fraction of radiation.

- Providers specify a diagnosis rather than request individual CPT codes
- Diagnosis and treatment plan compared to the evidence-based guidelines developed by our Medical Advisory Board.
- If request is authorized/covered or partially authorized/covered, then the treatment technique and number of fractions will be provided.
- For questions about specific CPT codes that are generally included with each episode of care, please reference the eviCore Radiation Therapy Coding Guidelines located online:

www.evicore.com/provider/clinical-guidelines-details?solution=radiation%20oncology

- Correct coding guidelines are based on ASTRO/ACR Radiation Therapy coding resources
