Prior authorization for certain provider-administered medications

Starting January 1, 2025, we'll require prior authorization for certain provider-administered medications for members 18 years of age and older, delivered in a provider office, outpatient hospital or ambulatory setting. A full list of these medications and their HCPCS codes are included below. Specific medication criteria for your reference can be found [here](#).

As part of this change, we've partnered with Care Continuum, to manage medical drug utilization review on our behalf. Beginning January 1, prescribers can submit electronic authorization requests to Care Continuum through the EviCore provider portal at evicore.com.

If you're not able to use the portal, Care Continuum is also available by calling 866-716-8338 or faxing 833-812-0687. Case status or inquiries can be handled through the EviCore provider portal or by calling Care Continuum.

Brief virtual trainings on the authorization process will be available before the launch and during the first week of go-live. All sessions are free of charge and require advance registration. Any members of your staff responsible for submitting prior authorization requests are encouraged to attend.

If you can't participate in a session, you can get a copy of the presentation and other relevant resources [here](#).
