

**Aetna Better Health of Maryland
Interventional Pain Management Code List**

CPT® Code	CPT® Code Description	Notes
20552	Trigger Point Injection, medicine injected (a shot) into one or two muscles to treat pain	
20553	Trigger Point Injection, medicine injected (a shot) into three or more muscles to treat pain	
22510	Percutaneous vertebroplasty, a surgical procedure done injecting a special medicine in the upper back area	
22511	Percutaneous vertebroplasty, a surgical procedure done injecting a special material into an area in the lower spine or back	
22512	Percutaneous vertebroplasty, a surgical procedure done injecting a special material into an additional area of the spine	
22513	Percutaneous vertebral augmentation or kyphoplasty, a surgical procedure done making a cavity in the bone in the spine or middle back	
22514	Percutaneous vertebral augmentation or kyphoplasty, a surgical procedure to make a cavity in the bone in the lower back	
22515	Percutaneous vertebral augmentation or kyphoplasty, a surgical procedure to make an additional cavity in the bone in the spine and add material to it	
22526	Percutaneous intradiscal electrothermal annuloplasty, a surgical procedure using heat applied to a disc in the back	
22527	Percutaneous intradiscal electrothermal annuloplasty, a surgical procedure using heat applied to a disc in the back	
27096	Injection (a shot) Procedure for Sacroiliac Joint, shots of pain numbing medicine into the sacroiliac joint or joint between the pelvis and the tailbone area using imaging guidance or detailed pictures	
62263	Percutaneous Lysis of Adhesions, procedure to break down scar tissue around the spine using medicine or a small tube for more than one session; 2 or more days	
62264	Percutaneous Lysis of Adhesions, procedure to break down scar tissue around the spine using medicine or a small tube for more than one session in one day	
62280	Injection (a shot) (a shot)/Infusion of Neurolytic medicine, an Injection (a shot) (a shot) of a drug into the part of the spine that contains spinal fluid in order to destroy nerve tissue and stop the nerves from sending pain signals	
62281	Injection (a shot) (a shot)/Infusion of Neurolytic medicine, an Injection (a shot) (a shot) of a drug into the neck or middle back area of your spine in order to destroy nerve tissue in order to stop the nerves from sending pain signals	
62282	Injection (a shot) (a shot)/infusion of neurolytic medicine, an Injection (a shot) (a shot) of a drug into the lower back or tailbone area of your spine in order to destroy nerve tissue and/or adhesions [scar tissue] in order to stop the nerves from sending pain signals	
62287	Decompression Procedure, a type of spine surgery done by using a needle to remove damaged discs in the spine	
62290	Injection Procedure for Discography, a medicine injected (a shot) into the lower back to treat pain	
62291	Injection Procedure for Discography, a medicine injected (a shot) into the middle or upper back to treat pain	
62292	Injection (a shot) (a shot) Procedure for Chemonucleolysis, procedure to inject a chemical enzyme or medicine into an herniated or injured spinal disc	
62320	Diagnostic or Therapeutic Injection (a shot) (a shot), a shot of a pain numbing medicine used to diagnose or treat pain in the neck or upper back area	
62321	Diagnostic or therapeutic Injection (a shot) (a shot), a shot of a pain numbing medicine used to diagnose or treat pain delivered using imaging (special pictures) to guide the Injection (a shot) (a shot) in the neck or upper back area	
62322	Diagnostic or Therapeutic Injection (a shot) (a shot), a shot of a pain numbing medicine used to diagnose or treat pain in the lower back area	

CPT® Code	CPT® Code Description	Notes
62323	Diagnostic or Therapeutic Injection (a shot) (a shot), a shot of a pain numbing medicine used to diagnose or treat pain delivered using imaging (special pictures) to guide the Injection (a shot) (a shot) in the lower back area	
62324	Diagnostic or Therapeutic Injection (a shot) (a shot), a shot of a pain numbing medicine used to diagnose or treat pain in the neck or upper back area	
62325	Injection (a shot) (a shot), a shot of a pain numbing medicine used to diagnose or treat pain delivered by using imaging (special pictures) to guide the Injection (a shot) (a shot) in the neck or upper back area	
62326	Injection (a shot) (a shot), a shot of a pain numbing medicine used to diagnose or treat pain in the lower back area	
62327	Injection (a shot) (a shot), a shot of a pain numbing medicine used to diagnose or treat pain delivered by using imaging (special pictures) to guide the Injection (a shot) (a shot) in the lower back area	
62350	Implantation, Revision or Repositioning of a Catheter, a drug pump placed under the skin that delivers medicine to relieve pain without any other surgery	
62351	Implantation, Revision or Repositioning of a Catheter, a drug pump placed under the skin that delivers medicine to relieve pain without removing a bone in the spine	
62360	Implantation or Replacement of Device for Intrathecal or Epidural Drug Infusion, a procedure to place a drug pump under the skin that delivers medicine to treat pain	
62361	Implantation or Replacement of Device for Intrathecal or Epidural Drug Infusion, a procedure to place a drug pump under the skin that delivers medicine to treat pain	
62362	Implantation or Replacement of Device for Intrathecal or Epidural Drug Infusion, a procedure to place a drug pump under the skin that delivers medicine to treat pain	
62367	Electronic Analysis of Programmable Implanted Pump, reading information from a pump that has been placed under the skin to deliver pain medication to areas of the body	
62368	Electronic Analysis of Programmable Implanted Pump, reading and resetting information from a pump that has been placed under the skin to deliver pain medication to areas of the body	
62370	Electronic Analysis of Programmable Implanted Pump, reading and resetting information from a pump that has been placed under the skin to deliver pain medication to areas of the body	
63650	Percutaneous implantation of neurostimulator, a procedure to insert a devise in the spine for the purpose of relieving pain	
63655	Laminectomy for implantation of neurostimulator, a spinal surgery to remove part of a spine bone to insert a device for the purpose of relieving pain	
63663	Revision Including Replacement, revising (fixing) or replacing an implanted device that carries electrical pulses to the spine using imaging guidance (detailed pictures)	
63664	Revision Including Replacement, revising (fixing) or replacing an implanted device that carries electrical pulses to the spine during a surgery to the spine, using imaging guidance (detailed pictures)	
64405	Injection(s), anesthetic agent(s) and/or steroid; greater occipital nerve	1/1/2020 AMA Revision
64451	Injection (a shot) (a shot) into a Joint, a shot of a medicine into the nerves of the hip region using imaging guidance or detailed picture studies to diagnose or treat pain	1/1/2020 AMA Additions
64479	Epidural Injection (a shot) (a shot), a shot of pain numbing medicine into the neck or upper back spinal nerves using imaging guidance or detailed pictures	
64480	Epidural Injection (a shot) (a shot), a shot of pain numbing medicine into the neck or upper back spinal nerves using imaging guidance or detailed pictures	
64483	Injection, anesthetic agent and/or steroid, transforaminal epidural;lumbar or sacral, single level	
64484	Injection, anesthetic agent and/or steroid, transforaminal epidural;lumbar or sacral, each additional level (List separately in addition to code for primary procedure)	
64490	Injection (a shot) of a medicine in the neck or upper back using imaging guidance or detailed pictures to diagnose or treat pain	
64491	Injection (a shot) of a medicine in the neck or upper back using imaging guidance or detailed pictures to diagnose or treat pain	
64492	Injection (a shot) of a medicine in the neck or upper back using imaging guidance or detailed pictures to diagnose or treat pain	
64493	Injection (a shot) of pain numbing medicine in the lower back using imaging guidance or detailed pictures to diagnose or treat pain	
64494	Injection (a shot) of pain numbing medicine in the lower back using imaging guidance or detailed pictures to diagnose or treat pain	

CPT® Code	CPT® Code Description	Notes
64495	Injection (a shot) of pain numbing medicine in the lower back using imaging guidance or detailed pictures to diagnose or treat pain	
64510	Injection (a shot) of pain numbing medicine in the neck	
64520	Injection (a shot) of a pain numbing medicine in the lower or mid back)	
64625	Radiofrequency Ablation (RFA), a procedure to treat pain by destroying the nerve tissue in the hip region using electric current	1/1/2020 AMA Additions
64633	Destruction by Neurolytic Agent, stopping spinal nerve pain in the upper or middle back area with a chemical medicine using imaging guidance (detailed pictures)	
64634	Destruction by Neurolytic Agent, stopping spinal nerve pain in the neck area with a chemical medicine using imaging guidance (detailed pictures)	
64635	Neurolysis Facet Nerve, destruction of spinal joint nerves in the lower back with a chemical medicine using imaging guidance or detailed pictures	
64636	Neurolysis of Facet Nerve, destruction of spinal joint nerves in the lower back with a chemical medicine using imaging guidance or detailed pictures	
64640	Destruction by Neurolytic Agent, managing spinal nerve pain with medicine	
72285	Discography, Cervical or Thoracic, a test performed with detailed pictures used to look at the cushions between the bones (vertebrae) of the spine and if the cushions are the reason for the neck or upper back pain	
72295	Discography, Lumbar, a test performed with detailed pictures used to look at the cushions between the bones (vertebrae) of the spine and if the cushions are the reason for the low back pain	
95971	Electronic Analysis of Implanted Neurostimulator Generator, reading information from a device that has been placed under the skin to deliver pain medicine to areas of the body	
95972	Electronic Analysis of Implanted Neurostimulator Generator, reading information from a device that has been placed under the skin to deliver pain medicine to areas of the body	
0200T	Percutaneous Sacral Augmentation Bilateral Injection, use of imaging guidance to inject bone cement into the tailbone area to make a fracture more stable	
0201T	Percutaneous Sacral Augmentation Bilateral Injection, use of imaging guidance to inject bone cement into the tailbone area to make a fracture more stable	
0213T	Facet Injection (a shot), Cervical/Thoracic, Injection (a shot) of a medicine in the neck or upper back using imaging guidance or detailed pictures to diagnose or treat pain	
0214T	Facet Injection (a shot), Cervical/Thoracic, Injection (a shot) of a medicine in the neck or upper back using imaging guidance or detailed pictures to diagnose or treat pain	
0215T	Facet Injection (a shot), Cervical/Thoracic, Injection (a shot) of a medicine in the neck or upper back using imaging guidance or detailed pictures to diagnose or treat pain	
0216T	Facet Injection (a shot), Lumbar/Sacral, Injection (a shot) of a medicine in the lower back using imaging guidance or detailed pictures to diagnose or treat pain	
0217T	Facet Injection (a shot), Lumbar/Sacral, Injection (a shot) of a medicine in the lower back using imaging guidance or detailed pictures to diagnose or treat pain	
0218T	Facet Injection (a shot), Lumbar/Sacral, Injection (a shot) of a medicine in the lower back using imaging guidance or detailed pictures to diagnose or treat pain	
0627T	Percutaneous Injection (a shot), Injection (a shot) of cells from another person at one level in the low back using x-ray pictures	1/1/2021 AMA Addition - Add on code. Redirect to Primary Code 0627T
0628T	Percutaneous Injection (a shot), Injection (a shot) of cells from another person at more than one level in the low back using x-ray pictures	1/1/2021 AMA Addition
0629T	Percutaneous Injection (a shot), Injection (a shot) of cells from another person at one level in the low back using computed tomography (CT), a special kind of picture study	1/1/2021 AMA Addition - Add on code. Redirect to Primary Code 0629T
0630T	Percutaneous Injection (a shot), Injection (a shot) of cells from another person at more than one level in the low back using computed tomography (CT), a special kind of picture study	
0784T	Insertion or replacement of percutaneous electrode array, spinal, with integrated neurostimulator, including imaging guidance, when performed	
0785T	Revision or removal of neurostimulator electrode array, spinal, with integrated neurostimulator	
C1767	Generator Neurostimulator, device that is placed under the skin that sends pulses to the nerves to help manage pain	
C1787	Patient Programmer Neurostimulator, a device that allows the patient to set the strength of the nerve pulses to manage pain	

CPT® Code	CPT® Code Description	Notes
C1816	Receiver and/or Transmitter Neurostimulator, device that is placed under the skin that helps manage pain and can be recharged	
C1820	Generator Neurostimulator, device that is placed under the skin that sends pulses to the nerves to help manage pain and can be recharged	
G0260	Sacroiliac Injection, injection (a shot) into sacroiliac joint or joint in the lower back to deliver numbing medicine, a steroid, or other medicine, with or without a special picture of the area	
L8680	Implantable Neurostimulator Electrode, a surgically placed wire that conducts electrical pulses to your nervous system to treat chronic pain and other conditions	
L8681	Patient Programmer Neurostimulator, a device that allows the patient to set the strength of the nerve pulses to manage pain	
L8682	Implantable Neurostimulator Radiofrequency Receiver, device that is placed under the skin to help manage pain	
L8683	Radiofrequency Transmitter External, a device used outside of the body to supports pain management	
L8685	Implantable Neurostimulator Pulse Generator Rechargeable, device that is placed under the skin that sends pulses to the nerves to help manage pain and can be recharged	
L8686	Implantable Neurostimulator Pulse Generator, device that is placed under the skin that sends pulses to the nerves to help manage pain	
L8687	Implantable Neurostimulator Pulse Generator Rechargeable, device that is placed under the skin that sends pulses to the nerves to help manage pain and can be recharged	
L8688	Implantable Neurostimulator Pulse Generator, device that is placed under the skin that sends pulses to the nerves to help manage pain
